### Features

1. Spout-shape design: When moms need to pour out milk, they can follow the dotted line to cut the spout easily and quickly.
2. There are symbols on the body of bags change when temperature changes (Check graph right).
3. Environment protection and non-toxic. Safe materials.
4. Double-layers sealing strip design enhances the leak-proof and isolates the air.
5. 7oz/200mL large-size storage and can be stored upright.
6. Moms can mark the date on the body of bags to avoid the milk expired.

### Cautions

1. The bag will expand when it is frozen, so it can't storage milk more than 7oz/200mL.
2. When moms need to haw the milk, please use Bottle Warmer or warm water(122°F to 140°F/50°C to 60°C) to heat the bag. DO NOT use the microwave or boiling water to heat the milk or the nutrition will lose.
3. Please use Marker Pen to record the date on the bag. DO NOT use sharp pen to record to avoid the bag break.
4. DO NOT refreeze breast milk which had been unfrozen before.
5. Please store it where children can not reach.
6. This product is a disposable item. DO NOT reuse it.
7. Please storage the bag upright on the fridge when you freeze the milk.
