Product description

HSD2000 has perfect performance thanks to 64bit DSP, high performance FPGA and the newest motor control algorithm. It can drive both synchronous servo motor and asynchronous servo motor, as well as induction motors. Available for pulse / analog / field bus / digital input signal / keyboard Control. HSD2000 supports all types of encoders including incremental, SinCos, absolute depending on the expansion encoder card(PG card).The power range is from 2.2kW up to 132kW which can meet requirements from various of industrial applications.

At a glance

- Employed DSP+ FPGA, reliability and performance are improved perfectly
- Speed mode/ torque mode/ servo mode/ spindle drive mode are available
- Auto-turning of synchronous servo motor pole angle and match all brands of servo motor easily
- Various setpoint channels: pulse/analog/digital IO/filed bus
- In servo mode the positioning accuracy is less than ± 1 pulse
- In close-loop vector control the speed ratio is up to 1: 5000 which can achieve high speed accuracy
- Time-sharing control of 2 motors with different parameter groups

Customer benefits

- Stainless steel winder/rewinder
- Elevator traction machine drive(synchronous motor or induction motor)
- PMSM control for servo/positioning application in machine tool feeder and/or production machinery industrial etc.
- Integrated spindle motor orientation control function which saves cost for machine builder

Specifcaiton

Items	Description
Input	Voltage range Three-phase, 380V~480V Voltage unbalance rate: <3%
	Frequency range 50Hz/ 60Hz ±5%
DC Link	Voltage range 537V~679V
Output	Voltage range AC380V, 400V, 415V, 440V, 460V, 480V
	Frequency range 0Hz~1000Hz
Peripheral Interface	Programmable digital input 10 inputs
	Programmable analog input AI1: 0~10V or 0~20mA AI2: 0~10V or 0~20mA AI+/AI-: -10V~+10V analog voltage differential input
	Programmable open collector output 3 output (open collector output or high-speed pulse output with 100kHz)
	Relay output 2 outputs
	Analog output 2 outputs, optional 0/4~20mA or 0~10V
Performance	Control mode Magnetic flux vector control without PG, magnetic flux vector control with PG, servo control, V/F control with PG
	Overload capacity 150%rated current in 2 minutes, 200%rated current 0.5 seconds
	Torque control Support magnetic flux vector control without PG, magnetic flux vector control with PG, servo control
	Torque response ≤10ms (magnetic flux vector control with PG, servo control) ≤20ms (magnetic flux vector control without PG)
	Starting torque 0Hz of 150%rated torque (magnetic flux vector control without PG) 0Hz of 200%rated torque (magnetic flux vector control with PG)
	Speed ratio 1: 200 (magnetic flux vector control without PG), 1: 5000 (magnetic flux vector control with PG, servo control)
	Speed control accuracy ≤±0.3%rated synchronous rotational speed (magnetic flux vector control without PG) ≤±0.1%rated synchronous rotational speed (magnetic flux vector control with PG, servo control)
	Positioning accuracy ±1 pulse
Function	Setpoint channels Digital,analog, serial communication,multistage velocity, simple PLC, PID output. Combination and/or channel switch are available
	Standard functions Automatic current limiting Automatic carrier wave adjustment Textile swing frequency Built-in process closed loop control Spindle orientation control
	Automatic voltage regulation Keep constant output voltage automatically in case of line voltage change
	Protection Lack-phase protection (optional), over current protection, overvoltage protection, lack-voltage protection, over-thermal protection, overload protection, off-load protection

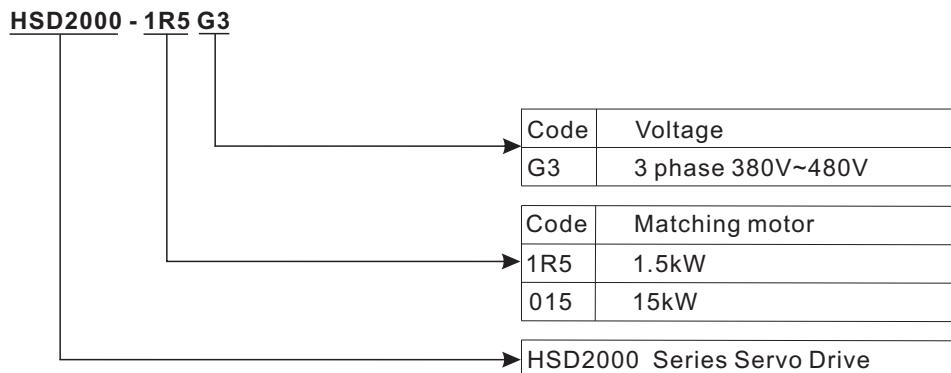

Items	Description	
Environment	Ambient	Indoor with good ventilation and free from corrosive gas and conductive dust
	Altitude	Need to rise the rated power(derating 10%in each 1000 meters rising) when the altitude is more than 1000m
	Temperature	-10°C~+40°C, derating is required from 40~50°C; Increase every 1°C above 40°C, derating 2%, highest temperature allowed: 50°C
	Humidity	95%RH without dew condensation
	Vibration	<5.9m/S2 (0.6g)
	Enclosure rating	IP 20
	Cooling	Fan force cooling
